

PROCESS CONTROL HP3000 RELEASES

RELEASE: 13.0.0

PROGRAM DESCRIPTION

PCP320 PRINT ORDERS

The program has been re-written. If a work order is printed for the first time, any sub-assemblies will be printed and new work orders will be created for the sub-assemblies. If a work order is reprinted, the sub-assemblies will be printed but no new work orders will be created.

PCP320 PRINT ORDERS

Problems with the wrong materials and wrong inventory tags printing on a work order has been corrected.

PCP650 INGREDIENT XREF

A new format (3) has been added to the report. It will print a summary by product. It will display the product number, description, pounds produced, total material cost, labor cost, and cost per pound by date range.

RELEASE: 14.0.1

PROGRAM DESCRIPTION

PCP350 WORK REQUIREMENTS

A problem with the materials not being extended correctly on sub assemblies has been corrected.

RELEASE: 14.0.2

PROGRAM DESCRIPTION

PCP152 PRODUCT MASTER (MATERIALS)

An automatic review is no longer done when the materials are modified.

PCP320 PRINT ORDERS

The product number is now printed on all labels.

RELEASE: 14.0.3

PROGRAM DESCRIPTION

PCP530 UPDATE INVENTORY

An option to automatically transfer the finished good to a different warehouse has been added to the screen.

PCP530 UPDATE INVENTORY
A problem with the warehouse transfer not working has been corrected.

PCP530 UPDATE INVENTORY
A problem with leaving the work order number to blank has been corrected.

RELEASE: 15.0.0

PROGRAM DESCRIPTION

PCP152 PRODUCT MASTER (MATERIALS)
A group number has been added to the line items.

PCP153 PRODUCT MASTER (INSTRUCTIONS)
A group number has been added to the screen.

PCP320 PRINT ORDERS
A new format (5) has been added to the screen. It will page break using the new groups.

PCP640 HISTORY LIST
The program now separates the sub materials and instructions based on the group breaks.

RELEASE: 15.0.1

PROGRAM DESCRIPTION

PCP320 PRINT ORDERS
A new format (6) has been added to the screen. It will print labels three up on a laser printer.

RELEASE: 15.0.2

PROGRAM DESCRIPTION

PCP320 PRINT ORDERS
The error "Invalid work order" is no longer displayed if the work order range is left blank.

RELEASE: 20.0.3

PROGRAM DESCRIPTION

PCP510 POST COMPLETIONS
If the number of batches is entered on the posting screen, the labor is now calculating correctly.

RELEASE: 20.0.4

PROGRAM DESCRIPTION

PCP530 UPDATE INVENTORY

The average cost calculation has been removed from the program since it is taken care of in Inventory.

RELEASE: 20.0.5

PROGRAM DESCRIPTION

PCP320 PRINT ORDERS

When checking Inventory quantities, if the quantity on hand is equal to the issue quantity, a sub-assembly work order is no longer created.

RELEASE: 20.0.6

PROGRAM DESCRIPTION

PCP980 ITEM SEARCH

The program was modified to match the Item Search screen in Inventory.

RELEASE: 20.0.7

PROGRAM DESCRIPTION

PCP980 ITEM SEARCH

The zero quantity now defaults to "N" so all qualified items are displayed.
