

HUMAN RESOURCE

A company's employees are their most important resource. Yet many businesses cannot readily retrieve valuable information on an employee's history, skills, education, compensation, benefits, etc. This information can be critical in bringing to the company, and to each employee, the most beneficial aspects of their cooperative interaction. We at GENESIS have developed this **HUMAN RESOURCE** system to be used as a tool by businesses to better organize and ease the collection and reporting of this very important data. **HUMAN RESOURCE** is designed to interface directly with GENESIS' PAYROLL, yet remain a separate system for security purposes. We designed the system to collect information valuable to all businesses, yet allow businesses to customize the system to their particular needs. On-line help, flexible reporting, screen inquiries, easy edits, quick retrieval and menu commands are just some of the capabilities which we feel will make **HUMAN RESOURCE** one of your most important data processing systems.

FEATURES

DESIGN

As with all GENESIS software systems, **HUMAN RESOURCE** was written, designed and maintained by GENESIS. All packages are online database designed systems, which can run on Windows, Linux, HP9000 (Unix), and HP3000 (MPE) platforms. Access to the system is protected by our special security modules, which allows control of both, read and write capabilities for every screen. An online help facility is integrated into each screen.

CUSTOMER SUPPORT AND SERVICES

Complete user documentation and object code are included in the price of the package. Continuing support, source code, and customization are also available.

SERVICES AVAILABLE INCLUDE:

Technical and User Training	Data Collection Equipment and Consulting
Software Customization and Modification	Documentation Production
Updates and Enhancement Subscription	System Design
Installation Service	Sale Of Your Old Equipment
