

PROCESS CONTROL

Managing the production of a product at a processing facility can be a great challenge to a business. Customer orders, work orders, inventory, schedules, loading, costs, labor, materials, processes, yields, requirements, and so much more must all be analyzed and correct decisions made or thousands of dollars can be lost. GENESIS has developed a **PROCESS CONTROL** module which, when integrated with our other modules such as **ORDER PROCESSING**, **INVENTORY CONTROL** and **PAYROLL**, can provide to the production supervisor valuable and timely information required to make the proper decisions. Automated processes for the calculation of costs, updating of inventory, producing plans, and creating work orders are all included.

FEATURES

Some of the features and benefits available in **PROCESS CONTROL** include:

BILL OF MATERIALS
 YIELDS
 COSTS
 PROCESSES
 ORDERS
 WORK ORDERS
 PAYROLL
 REQUIREMENTS
 LOADING
 HISTORY
 INVENTORY
 AND MORE

BOMs are stored with processes, instructions, sub-assemblies and materials
 Yields are calculated and updated into history
 The cost to produce including labor overhead and materials is stored
 Each process in production is recorded and checked
 Orders are passed from **ORDER PROCESSING** and **PURCHASING**
 Work Orders can be created and scheduled as required
 Labor hours can be posted to work orders and payroll
 Product and Raw material requirements can be listed
 Orders are checked against processes output capacities
 The history of each work order is recorded
INVENTORY will be updated from production

....

REPORTS

Through a flexible reporting capability the operator can generate unlimited reports. All of our reports are available through easy to use menus, which can be quickly accessed. Some of the reports available include:

SCHEDULE	Schedule and plan Production from OP, PU, PC
REQUIREMENTS	The raw material required to meet orders can be printed
LOADING	Each operation's production load can be reported
PRODUCT	A schedule of products can be printed
FORECASTS	Customer, purchasing and production forecasts can be reported
WORK ORDERS	Each production work order can be reported
LABOR	Payroll labor hours can be reported
HISTORY	The history of production can be listed
LISTS	Lists are available of products and processes
INQUIRY	On-line inquiries are available on each product
COSTS	Standard and actual material and labor costs are available
VARIANCES	Yields and variances from standard can be reported
AND MORE

DESIGN

As with all GENESIS software systems, **PROCESS CONTROL** was written, designed and maintained by GENESIS. All packages are online database designed systems, which can run on Windows, Linux, HP9000 (Unix), and HP3000 (MPE) platforms. Access to the system is protected by our special security modules, which allows control of both, read and write capabilities for every screen. An online help facility is integrated into each screen.

CUSTOMER SUPPORT AND SERVICES

Complete user documentation and object code are included in the price of the package. Continuing support, source code, and customization are also available.

SERVICES AVAILABLE INCLUDE:

Technical and User Training	Data Collection Equipment and Consulting
Software Customization and Modification	Documentation Production
Updates and Enhancement Subscription	System Design
Installation Service	Sale Of Your Old Equipment
Remote Modem Support	Maintenance Services
Need and Requirement Consultation	Specification Development
Configuration Planning	Financing and Leasing Programs
Database Conversion	Personal and Hand-held Computers
Phone-In Consultation	Equipment Sales and Support
